

Kitchen Plan for Quoting Purposes

A simple drawing is all that you need for us to provide you with a free quote!

Steps to follow when creating your plan:

1. Sketch a general plan.
2. Provide all relevant benchtop measurements in millimeters (mm).
3. Mark all exposed edges that you require to be polished with an X.
4. Mark where splash backs are with an O (Provide measurements separately).
5. Show the position of sink/s and hot plates.
6. Show any overhangs with dotted lines and include measurements.
7. Repeat the process for other areas/rooms that require stone benchtops.

*Please Note: The drawing does not have to be to scale.
